DAO SHEAR BLADES

Figure 1. DAO 144-6882 and DAO 760-212.

144-6882

760-212

DAO Shear blades are manufactured from high quality, heat resistance carbide steel, giving durability with minimal wear and tear. All blades are ground in pairs to exacting standards, including cutting clearances to avoid shear marks. Our blades are all made in Great Britain to the highest standard, they have been widely used in the UK and European glass works for many years, offering outstanding performance at a low cost.

D A Oldfield Ltd. strongly recommend that blades are set up on our DAO 94-27 shear blade checking fixture, and the shear arms and fixture is regularly checked with our shear alignment jig to ensure best cutting practice.
