DAO TK9284 – Transfer Drive Moving Gearbox

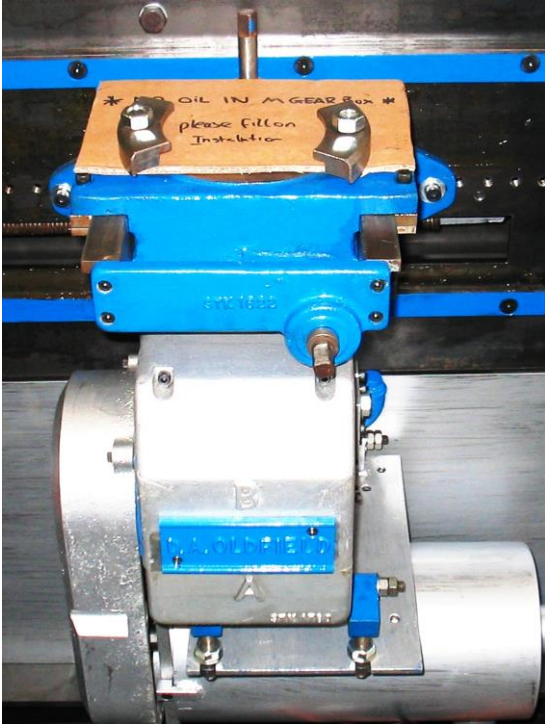

Figure 1. Front view of moving gearbox

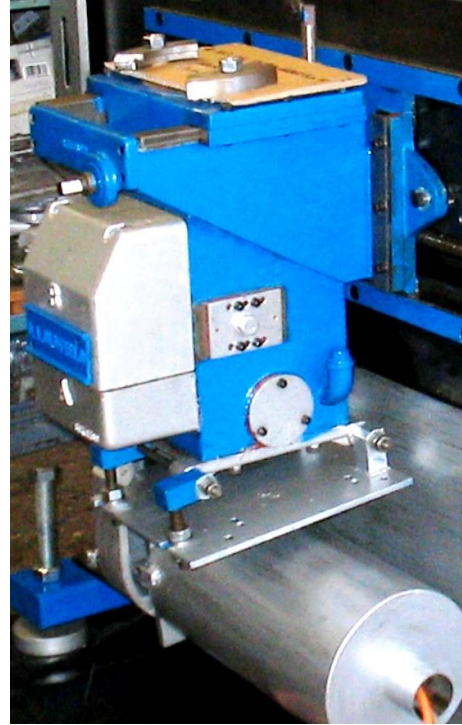

Figure 2. Side view of moving gearbox

Features

- ☼ Fully adjustable in both horizontal and vertical planes.
- ☼ Position of the gearbox can be changed on the run, to allow the transfer position to be set. Depending on the size of the bottle.
- ☼ The A and B gears can be changed at the front of the gearbox with easy access.
- ☼ The whole gearbox can be removed very quickly in the event of a breakdown.

Benefits

- This allows the end user to use different sized transfers, which can be lifted in and out accordingly.
- This saves on production stoppages to adjust the transfer position.
- Improved speed changing from 1 spacing size to another.
- This makes the gearbox a quick change product where a spare can be exchanged in minutes saving time and money.
