## Felt Curved Push Bar Spacer

Figure 1. shows two views of our PB 28 push bar curved adjustable spacer assembly fitted with high temperature soft felt, designed for handling round containers without creating contact bottle faults.

Figure 2. shows four PB 28 push bar curved spacers mounted on a common uni-rail which is mounted on a push bar front.

### Features

- ☀ **CNC machined parts manufactured from aluminium.**
- ☀ **Fitted with high temperature felt which can be replaced without replacing the block. Clean off the block and glue new felt back in position.**
- ☀ **The PB28 block assembly comes with high tensile cap screw and stainless steel nut.**
- ☀ **Smooth face in contact with glass.**
- ☀ **Blocks can be adjusted along the rail to make larger or smaller pockets.**

### Benefits

- Constant accuracy and light weight.**
- Saves on cost.**
- Simple to mount into uni-rail and adjust without springs!**
- No damage to glass from sharp edges.**
- Better control of bottles in pockets.**
