DAO Angular shear mechanism overhaul & Spare Parts

Figure 1 Finished unit ready to ship back to customer.

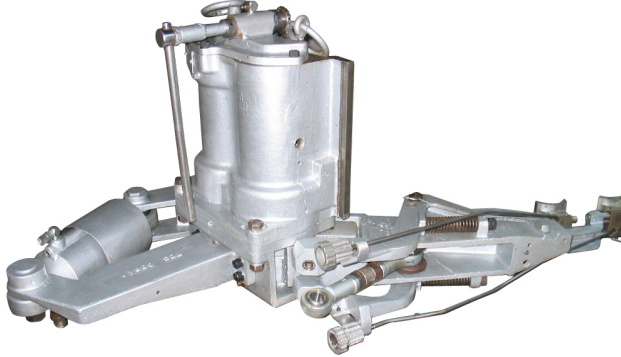

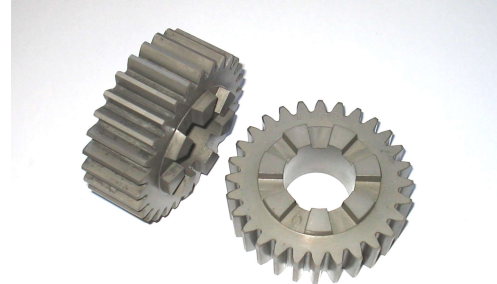

Figure 2 shows 81-4184 Sector

DAO offer refurbishment of your shear mechanisms in our workshops by our skilled fitting team back to a new standard, giving your shear mechanism a new lease of life at an affordable price.

This service usually starts by you sending us your worn spare unit. We strip the mechanism to identify the parts we need to replace, estimate the labour required to rebuild and send you our quotation with a delivery time scale. Or we can agree a price and delivery before you send your mechanism to us.

All of our Shear mechanisms are upgraded to leather oil seals, and the arms are checked for distortion on our jig before they are shipped back to the customer.

On receipt of your official order number we will proceed with the approved work. If you don't want to go ahead, we will send the unit back to you without you incurring a return cost.

We have a wide supply of spare parts available from stock or made to order in 4-5 weeks using modern CNC machine centres for uniformity and speed.
