

# D A Oldfield Ltd

GLASSWORKS TECHNOLOGY • PARTS • SERVICE

## SALES BULLETIN No 049 Design and Development

D A Oldfield Ltd have a long history of Design and Development, to this day we have a team of experienced engineers and Draftsmen working on projects for customers. This work is also used to further update and advance DAO products. For example; whilst working on IS Machine parts, we are finding ways to provide better performance, longer life and simply engineering a way around problem parts.

We are able to bring a wealth of machining and product knowledge, from IS Machines to Feeders in addition to our advanced understanding and use of CAD longer than many in the industry.

### Process:

To begin with, customers contact D A Oldfield with either an engineering problem or idea for a new product/solution.

An experienced Draughtsman or Engineer will stay in contact to consult in detail either the problem or idea you have.

Once happy they will set to work either engineering a solution or designing a new product.
