

SALES BULLETIN No 016

TYPE 178 WARE TRANSFER FINGERS WITH STAINLESS STEEL FELT INSULATION.

FEATURES

- ☀ Finger metalwork and chain mountings are made from stainless steel.
- ☀ Laser cut and folded plate using CNC machines.
- ☀ Fingers fitted with 6mm thick stainless steel felt material rated at 750° C.
- ☀ Fingers are fastened together with high tensile dome head screws.
- ☀ Available with carbon insulation if preferred.
- ☀ Available from stock most times.
- ☀ Plates, finger insulators and felt insulation available as spare parts.

BENEFITS

- Very strong, none corrosive and long lasting.
- Every finger the same size and shape.
- The thick felt presents a cushioning contact with the glass.
- Fingers can change hand by undoing screws and turning the plate around.
- Giving the customer a choice of insulating materials.
- Large orders 2 week turnaround.
- Finger assemblies can be repaired without replacing the chain carriers.
